KEEP YOUR FINE JEWELRY SPARKLING

Clean diamonds sparkle because the maximum amount of light can enter and return as fiery brilliance. Lotions, powders, soaps, even natural skin oils put a film on diamonds.

In between professional cleaning by Fred Meyer Jewelers, you can maintain the brilliance of your diamonds by using a commercial jewelry cleaning solution*, or lukewarm soapy water and a soft brush. Rinse under warm water and pat dry with a soft lint-less cloth.

*Commercial cleaning solution is not recommended for emeralds, pearls, opals or other semi-precious stones.

Although a diamond is the hardest natural substance, it is not unbreakable and can be scratched by other diamonds. It is best to store your fine jewelry items separately.
